Sujan Rokad

Full-Stack Developer

Hamilton, ON, Canada | sujanrokad44@gmail.com
sujanrokad.com | linkedin.com/in/sujanrokad | github.com/sujan-22

SUMMARY

Full-stack developer with two years of professional experience building production web applications for enterprise clients with React, TypeScript, C#/.NET and SQL, from user interfaces and REST APIs to database design, integrations and releases. Also builds full-stack products with Next.js, Node.js, PostgreSQL and GraphQL.

EXPERIENCE

Application Developer
Sep 2024 – Present

Evenica Corp.
Burlington, ON

Joined as a co-op student, continued part-time while completing my diploma, and moved to full-time in December 2025.

- Re-architected a B2B order-history feature to serve data from a synchronized read database instead of live ERP calls, building the data model, sync jobs, C# REST APIs and React UI.
- Built a bulk invoice-payment workflow for accounts with hundreds of open invoices, with batched operations and duplicate-payment safeguards that keep backend calls to a minimum.
- Wrote recursive SQL and C# services that resolve product substitution chains against multi-warehouse inventory for product pages, quick order and the cart.
- Delivered checkout validation, payment fixes, backorder tracking and GA4 analytics; diagnosed production issues across the UI, APIs, SQL, sync jobs and third-party services such as payment providers and Elasticsearch.
- Shipped through Azure DevOps CI/CD from development to UAT to production; wrote estimates, worked directly with client stakeholders and mentored newer developers.

Tech: React, TypeScript, C#/.NET, SQL Server, REST APIs, Elasticsearch, Azure DevOps, Git, Microsoft Dynamics 365

PROJECTS

DesignMyCase | Next.js, TypeScript, PostgreSQL, Stripe, AWS S3, Playwright — sujan-capstone.vercel.app

- Capstone: full-stack e-commerce app for custom phone cases with an image editor on a live device mockup, real-time pricing, Stripe checkout and an admin dashboard. 215 automated tests plus end-to-end tests in GitHub Actions.

Meridian | Next.js, GraphQL, Apollo, Drizzle ORM, PostgreSQL, Docker — github.com/sujan-22/meridian

- Time tracker with a drag-and-resize weekly calendar, Google Calendar sync and automatic timesheet preparation, built on a code-first GraphQL API with generated, type-safe client operations.

Client websites | Next.js, React, TypeScript, Tailwind CSS — orbisvalves.com · rovantachem.com

- Designed and shipped production websites for two industrial manufacturers (Orbis Valves, Rovanta), with data-driven product catalogues, inquiry and quote forms, and technical SEO (structured data, metadata, sitemaps).

SKILLS

Languages: TypeScript, JavaScript, C#, SQL, Python, Java, HTML, CSS

Frontend: React, Next.js, TanStack Query, Zustand, Tailwind CSS, SCSS, React Native, accessibility

Backend & data: Node.js, .NET, REST APIs, GraphQL, PostgreSQL, SQL Server, MongoDB, Prisma, Elasticsearch

DevOps & testing: Git, Azure DevOps, GitHub Actions, CI/CD, Docker, Vercel, AWS S3, Jest, Playwright, Postman

Platforms: Microsoft Dynamics 365 (Commerce, Finance & Operations), X++

EDUCATION

Computer Systems Technology, Software Development
2022 – 2025

Mohawk College · Dean's List
Hamilton, ON
